Hydrobiologia **359:** v–vii, 1997.
M.A. Simovich, C. Sassaman & D. Belk (eds), Studies on Large Branchipod Biology and Conservation.

Contents

Preface ix

List of Participants at the Third International Branchiopod Symposium ..... xi–xii

Regional Faunas and Community Assemblages

Distribution, diversity and conservation of Anostraca (Crustacea: Branchiopoda) in southern Africa
by M.L. Hamer & L. Brendonck 1–12

Distribution and phenology of large branchipods in Austria
by E. Eder, W. Hödl & R. Gottwald 13–22

Community structure of branchiopods (Anostraca, Notostraca and Conchostraca) in the Banat province in Yugoslavia
by B. Petrov & D.M. Cvetković 23–28

The status of Anostraca, Notostraca and Conchostraca (Crustacea: Branchiopoda) in Yugoslavia
by B. Petrov & I. Petrov 29–35

On the presence of the genus *Branchipus* Schaeffer, 1766 (Crustacea: Anostraca) in Macedonia
by S. Petkovski 37–44

Large branchiopod assemblages common to Mexico and the United States
by A. M. Maeda-Martínez, D. Belk, H. Obregón-Barboza & H.J. Dumont 45–62

New records of large branchiopods (Branchiopoda: Anostraca, Notostraca and Spinicaudata) in Mexico
by A. M. Maeda-Martínez, H. Obregón-Barboza & H. García-Velazco 63–68

Large branchiopod Crustacea (Anostraca, Notostraca, Spinicaudata) of the Barents Region of Russia
by N.V. Vekhoff 69–74

New records and observations on the anostracan genus *Eubranchipus* in California
by R.E. Hill, D.C. Rogers, B. Quelvog & S.P. Gallegher 75–81

Taxonomy and Systematics

On potentials and relevance of the use of copulatory structures in anostracan taxonomy
by L. Brendonck & D. Belk 83–92

Branchinella maduraiensis Raj (Crustacea, Branchiopoda, Anostraca) shown by new evidence to be a valid species
by L. Brendonck & D. Belk 93–99
Chirocephalus ponticus n. sp. (Crustacea: Anostraca) and its affinities to the other Turkish species of the genus.
by L. Beldjal & J. Mertens 101–111
Observations on the identification of California anostracan cysts
by R.E. Hill & W.D. Shepard 113–123

Genetics and Evolution

Reproductive isolation and genetic differentiation in North American species of *Triops* (Crustacea: Branchiopoda: Notostraca)
by C. Sassaman, M.A. Simovich & M. Fugate 125–147
Population genetic structure of a California endemic branchiopod, *Branchinecta sandiegonensis*
by C.P. Davies, M.A. Simovich & S.A. Hathaway 149–158
Extraction of DNA from anostracan cysts (Crustacea, Branchiopoda) for use in RAPD-PCR analysis
by J.A. Moorad, M.S. Mayer & M.A. Simovich 159–162
Gynandromorphism in Anostraca: multiple mechanisms of origin?
by C. Sassaman & M. Fugate 163–169
Anatomical evidence for androdioecy in the clam shrimp *Eulimnadia texana*
by N. Zucker, M. Cunningham & H.P. Adams 171–175

Ecology

Horizontal distribution and abundance of cysts of several large branchiopods in temporary pool and ditch sediments
by A. Thiéry 177–189
Notes on the life history of the clam shrimp, *Eulimnadia texana*
by S.C. Weeks, V. Marcus & S. Alvarez 191–197
Resilience of anostracan cysts to fire
by M.L. Wells, S.A. Hathaway & M.A. Simovich 199–202
Anostracans in dark sections of Saudi Arabian caves
by D. Belk & W.D. Peters 203–206
Feeding strategy of two sympatric anostracan species (Crustacea)
by L. Beladjal, N. Peiren, K.R. Dierckens & J. Mertens 207–212

The effects of pond duration on the life history traits of an ephemeral pond crustacean, *Eulimnadia texana*
by V. Marcus & S.C. Weeks 213–221

Aquaculture

Intra- and interspecific variation in the chitin content of some anostracans
by H.M. Cauchie, G. Murugan, J. P. Thomé & H.J. Dumont 223–228
Evaluation of the fatty acid profiles of two fairy shrimp species, *Branchipus pasai* Cottarelli, 1969 and *Chirocephalus kerkyrensis* Pesta, 1936 (Crustacea, Anostraca) fed different diets
by G. Mura, F. Ferrara, M. Delise, F. Fabietti & A. Bocca 229–235
Biochemical (fatty acid profile) diversity in anostracan species of the genus *Chirocephalus* Prévost
by G. Mura, F. Ferrara, F. Fabietti, M. Delise & A. Bocca 237–241

Checklist

Supplement to 'Checklist of the Anostraca'
by D. Belk & J. Brtek 243–245
